

Priorities by Eisenhower principal ... („importance over

- **A - Leads to target – and is critical or overdue – no other 'first' except other !**
- **B - Leads to target ... thus highest importance after A**
- **C – No A, No B then C**
- **X – Don't care**

Prio	Task & Doing	Target date	State
A	Start on last official release 1.6.1a1 and work in patches by Rildo Pragana for TCL/TK-8.5 When working with 8.5 put fixes for 8.6 on top. <hr/> Fixed. Everything works fine with standard widget sets. BLT & Iwidgets hidden in dir. OLDstuff	Feb.2016	Done Put on GitHub [PL0001]
A	Fix quirks with Mclistbox („... dont have a '-state' option ...“) <hr/> Replaced with latest Mclistbox code from Github	Feb. 2016	Fixed Done [PL0002] [PL0003]
A	Include 'tablelist' and make it internal	Feb. 2016	Done [PL0004]
A	Replace Bwidgets in version 1.3.1 by newer version (available 1.9.9.) <hr/> Attempted, but needs wider work. Lot of modules ...	Feb. 2016	Ongoing
A	Bring Iwidgets back to work <hr/> Works if Itcl & ITK is present. But some widgets crash vTcl on project reload (Radiobox & Buttonbox). Needs to contact Iwidget developers Disabled them ... <code>mv radiobox.wgt radiobox.wgt-disabled</code> <code>mv buttonbox.wgt buttonbox.wgt-disabled</code> Need to check all others as well. And ... iwidgets 4.1 provides many more that are not yet wrapped by a .wgt file ... lots' o'work ...	Feb. 2016	Ongoing
B	Better versioning concept M.R.mm.pppp MM - Master version (1-2 digits) RR - Release (1-2 digits) mm - Maintenance Release (1-2 digits)	Feb. 2016	Started, 2016-02-20 Done , 2015-02-22/hph [PL0005]
